"The Bodyless Condor Report"

ARD:

Jim R. Williams

# SCOOP SNOOPS !!!!!

Those "crackling clouds" were at it again! Over Miami -- and one Dr. Simpson, of the National Hurricane Center, explained it all !!!!! Sooo! You have heard of the famous 'excuse' - Air Temperture Inversion Layer ???? NOW WE HAVE THE AIR 'SOUND' INVERSION LAYER..! Sad but true... "were sounds of crashing surf reflected from above from 10,000 to 20,000 feet up"... Of course, Miamians who HEARD this 'inversion' described it as "flapping, crinkling".... No, it's more like huge sheets of wax paper being crumpled"....! WE never heard waves making THIS sound -- HOWEVER, who are WE???? It WAS interesting to note that on Feb. 10th, the Weather Bureau was quoted as saying: " No one here has any sort of experiance, vicariously or otherwise, with noise in the clouds" \*\*\*\*\* AND \*\*\*\*\* On Feb. 11th - they gave the 'inversion' notice! AND, ANOTHER CLIP FROM ANOTHER PAER HAS THIS CHOICE BIT: Leonard Pardue, public information officer for the weather bureau said TEMPERATURE INVERSIONS ARE "QUITE COMMON - ALMOST A DAILY OCCURENCE.".... Remember now -- he said 'temperature'! --- The very LEAST they could do is to get togethher with their counterparts at the Air Force and AGREE on ONE explanation - even if it's WRONG! ..... The WATERY-TYPE 'MONSTERS' are here again..! A TWIN to the LOCH NESS MESS has been discovered! A prehistoric skeleton unearthed in a clay pit at STAMFORD (ENGLAND) -- about 150 MILLION YEARS OLD - 30 FEET LONG - with a SMALL HEAD, LONG TAIL AND FOUR PADDLES LIKE FLIPPERS - is raining confusion on poor Nessy! .....According to informants a WHALE, or OTHER large OBJECT was seen in the SCHUKILL RIVER by Philadelphia residents .... In January ???? FLASH! TROUBLE AHEAD FOR LEONARDO da VINCI -- A BRAZILIAN historical researcher says he found evidence that LdeV was NOT the inventor of the first ARMORED TANK! CATASTROPHIC! TOO BAD ANYONE had to invent it!!! -----Reports have come in for weird 'happenings' now taking place in the AMAZON region ( and S. A. in general ) -- a group of 7 men and appearances of 'certain devices' in widely scattered places in the world - Giant Mushrooms, out-of-season flowers created by heat and blooming in a few hours, kidnappings, teleportations, Little Men, BIG men, and BALD 'men'.....! O.C. "CHARLIE" NORRIS filed his claim TO THE MOON with HUMBOLDT COUNTY RECORDER -- claims he wants 10,000 square miles of it to "CREATE A NEW UTOPIA" ..... WHICH HE IS GOING TO CALL: MOONSHINE VALLEY ..... sigh-sigh... end of comment. Hope that "White Lightning" doesn't strike twice! ----- nothing is SACRED anymore..... A "starlight" (?) television camera that BEAMS COLOR PICTURES FROM INSIDE THE HUMAN BODY is being used by U.S. Army doctors..... Can't even have an ulcer in PRIVATE anymore! And-- in color yet...! THE " FLYING SAUCERS - HERE AND NOW" TV FILM (in color\$) with Dr. Frank Stranges and Brad Steiger and Yours truly was recently shown over CHANNEL 20 - SAN FRANSISCO - on a SUNDAY EVENING..! (PRIME TIME!) .... And .... also has been shown over BBC in London..! our book - FLYING SAUCERS ARE HOSTILE - is listed in the bibliography of the new book - "UFO'S - YES" by Dr. Saunders- Colorado U.'s most celebrated 'run-away'!....The MARCH ISSUE OF "EXPLORING THE UNKNOWN" contains an article written by KENNETH LARSON - Director of our West Coast Office....! WATCH FOR AN ARTICLE BY OTTO BINDER AND YOURS TRULY in an up-coming SAGA....! AND -- the NEW "AWARD SPECIAL" will be out soon that STEIGER and SCOOP have just finished..... CLUE OF THE MONTH ..... "DISCOVERED SHAFT COULD BE LOST SPANISH GOLD MINE" ..... LOCATION ????? SOCORRO, NEW MEXICO !!!!! THINK ABOUT IT...! Quote ..... "No evidence of a tunnel leading from the mine shaft at a depth of 65 feet was found, but, is there an UNDISCOVERED TUNNEL FROM THE WEST CONNECTING WITH THE SHAFT AT A GREATER DEPTH???" HMMMMMMMMMMMM - ?

SAUCER SCOOP is an information outlet - address: 6464 34th. Ave. No. St. Petersburg, Fla. - 33710. We print on a monthly basis - 12 issues - \$4.00. OVERSEAS - \$6.00. ORO -- O.R.O.

O.R.O. ---- OMEGA RESEARCH ORGANIZATION (a subsidiary of: I.R.I. Associates)  
INTERNATIONAL RESEARCH INVESTIGATIONS

I.R.I.: ANDREW BACHE - Board Chairman  
O.R.O.: JOAN WHITENOUR - President  
GEORGE MENON - Executive Director

OMEGA RESEARCH ORGANIZATION (ORO)

As a result of increased MIB activity and the many requests that have been received by SAUCER SCOOP concerning the possibility of forming an Organization to deal effectively with this situation, we now announce the formation of a select group to be known as OMEGA.

I am, at this time, setting forth the guidelines concerning the membership requirements for this Organization. There are neither membership fees NOR charges for information that will be released to members of ORO. We will adhere at all times to SAUCER SCOOP POLICY: To obtain thru diligent research, investigation and always MORE analysis, all data relevant to the UFO field in general, and to present through SCOOP - BOTH sides of any controversial aspect.

SPECIAL EMPHASIS will be placed on the MIB enigma, along with other UNSatisfactorily explained UFO phenomena. We have no paid employees, NOR will payment be given for research completed -- Nonetheless, credit will go to the deserving ones, along with our thanks and gratitude. And, perhaps, the gratitude of the world at large.

All that is necessary to join ORO is that the individual be a SCOOP SUBSCRIBER. To minimize administrative and postage expenses, it is requested that all ORO members, and those who request to join, please send a stamped, self-addressed envelope -- upon receipt of all ORO correspondence, you will be sent a membership card FREE. It also would be helpful if you would briefly state your age and background, and a statement as to how you feel you may assist us in our researching.

It is to be understood that YOU, as a member of OMEGA, will stand by, ready and willing to investigate, personally, any MIB/UFO related events that might arise in your local area and that is referred to you by this Office. Realizing the seriousness of the entire situation, we also do realize that some of you would prefer to remain anonymous, if this is YOUR case, please specify this in your first letter to OMEGA.....

SIGNED: GEORGE MENON

UFO STUDY CALLS RADAR INACCURATE - Washington - The first comprehensive, scientific study of UFO's graphically illustrated how much still is unknown about atmospheric optics and atmospheric electricity. It also points out the tremendous problem of anomalous propagation of radar signals. RADAR, IN FACT, JUST ABOUT FLUNKS THE TEST as an instrument for accurate observation of flying objects. After tracking down a large number of reported radar UFO sightings, investigators found so many possible explanations for the signals they termed it "essential" that more research be done to get more precise propagation knowledge, in the interests of aircraft safety... Some 35 visual and radar UFO cases were studied by Gordon Thayer, radio propagation specialist at the Environmental Science Service Administration (ESSA) at Boulder. Mr. Thayer notes that while radar at first "might appear to offer a positive, nonsubjective method of observing UFO's, he concludes that it is in many aspects substantially less comprehensive than the visual approach." ... While most radar UFOs can be explained by meteorological conditions, the Colorado University Panel has recommended to the Air Force that the radar problem be attacked on its own merits because of aircraft danger.

Both the NAS and panel recommended against further pursuit of UFO reports per se, and in fact urged dropping the Air Force's Project Bluebook in favor of using routine reporting channels. (Editor's note: WHAT routine channels?)

UNEXPLAINED GEMINI SIGHTINGS - Out of a number of objects not immediately identified during manned spaceflights there remain THREE which the Colorado group call "a challenge to the analyst," in that there still has been no explanation. Two were observed by Astronaut Jim McDivitt on Gemini 4. The first was a cylindrical object with a protuberance, which the astronaut reported seemed to be closing in. He later identified one of the Gemini photographs as showing the object. While North American Defense Command suggested that it might be Pegasus some 1200 miles away, Dr. Franklin Roach of CU concludes this is a suspect identification. Others listed by NORAD also seemed unlikely. Another object in polar orbit which appeared as a bright light to Mr. McDivitt also has not been identified as a satellite. Sighting of a booster accompanied by "hundreds of particles" were reported on Gemini 7, while ground observers thought it might be part of the Gemini launch, the fact that the astronauts reported it in polar orbit has not been reconciled.

ITALIAN GOVERNMENT CONCERNED - Reports have reached Rome that numerous Italian ships have been 'buzzed' by UFO's while at sea. Antonio de Arteiga has stated, in a special report to IUFOP H.Q.'s, that the government of Italy is "quite concerned" over the incidents. Freighters have been reportedly dived at by huge, glowing objects while on their way to ports in Africa and southeast Asia. One ship, the Genoa, allegedly had its radar equipment sheared off by one of the mysterious lights. The objects have been seen flying in formation, each formation consisting of at least 10 objects...

EXCERPTS - Colorado U. reports - taken from CHICAGO'S SUNDAY AMERICAN - Feb. 2-  
PRO - Case 46 - On May 11, 1950, a farmer's wife was feeding rabbits in her yard near McMinnville, Ore., when she saw a disk-like object "sort of gliding" across the sky. She called her husband who took two pictures of it. The rabbits remained calm. No flame was seen. The witnesses described the object as "brightly metallic, silver or aluminum colored, with a touch of bronze". It appeared, they said, "to have a sort of superstructure." They were not excited by the episode and waited until Mother's day to finish the film. They did not seek publicity. A local newsman, tipped off by citizens, called and found the negatives "on the floor under a davenport, where the witnesses' children had been playing with them." So casual was the farmer about the affair that he did not even get off his tractor when being interviewed about it by a Colorado investigator.

The photographs and the scene where they were taken have been subjected to extensive analysis. The conclusion reads:

"This is one of the few UFO reports in which all factors investigated - geometric, psychological, and physical - appear to be consistent with the assertion that an extraordinary flying object, silvery, metallic, disk shaped, tens of meters in diameter, and evidently artificial, flew within sight of two witnesses. It cannot be said that the evidence positively rules out a fabrication, altho there are some physical factors such as the accuracy of certain photometric measures of the original negatives which argue against fabrication."

CASE - ... A Rio de Janeiro society columnist reported, in 1957, receiving metal fragments from a reader who said they were from a "flying disk" that disintegrated in the near Ubatuba. "The claim was published that analyses of the fragments performed by a Brazilian government agency and others, showed the fragments to be magnesium of a purity unattainable by production and purification techniques known to man at that time." The fragments have figured prominently in many UFO books, one of which devotes 46 pages to their discovery and analysis. A sample was furnished by Jim and Coral Lorenzen, who organized a UFO study group in Tucson, Ariz. It was subjected to neutron activation analysis in the laboratories of the Bureau of Internal Revenue as was a run-of-the-mill magnesium sample furnished by the Dow Chemical company. From these and other tests, the sample was found to be a magnesium-strontium alloy of considerably less purity than that of Dow products from before the date of the "find." ... SCOOPNOTE: We quote from the CHICAGO SUNDAY AMERICAN --- "Are they or aren't they real? Read and judge for yourself!" Others cases from the report will be presented from time to time.....

"FIREBALL" FLASHES ACROSS SOUTHWEST - Chihuahua City, Mexico - Feb. 8, 1969 - A huge fireball, believed to have been a meteor or a polar orbiting satellite, was sighted over a large section of the southwestern United States and Northern Mexico. Witnesses said the blazing light, streaming a tail of fire like a streaking comet, lighted the early morning hours "like day". Residents at Santa Barbara, El Oro and Allende, Mexico, ran screaming into the streets. The El Paso Times said the fireball was first seen as a small light and became larger and larger as it moved from north to south. Its terrifying roar increased as it grew larger. Dr. Ronald Schorn, an astronomer, said TREMORS felt by residents as the fireball passed nearby could have been sonic booms created by its supersonic movement... Witnesses in Durango and Chihuahua City said the earth trembled so much that windows were broken in each city....  
SCOOPNOTE: YUP, that shore was a humdinger of a 'polar orbiting satellite'!!!!  
ECHO was NEVER like this! "ALLENDE" you say? A city? Carlos, are you there??

\*\*\*\*\*

MEXICO CITY, MEXICO - March 25, 1968 - Dr. Jose de Jesus Fonseca and his wife, Dr. Ema Fonseca, were driving with a friend when they saw a spherical, luminous object moving at a great velocity. The object was followed at what seemed about half a yard by a sort of halo that ended in a point and appeared to be three times as large as the object itself. Thinking it was a plane in trouble, they called the airport. They learned that airport personnel had also seen the object but could not identify it.

POZA RICA, VERACRUZ - August 10, 1968 - Five spherical yellow-ish white objects flying in formation in a N-S direction, were observed by the population of this city for about five minutes. Several witnesses reported that one of the objects was larger than the others and appeared to be the leader. When the objects were directly over the city they broke formation, the smaller four continued south and the larger one disappeared toward the east. Witnesses said they were traveling too fast to be conventional aircraft.

MEXICO CITY, August 13, 1968 - Numerous persons sighted a pear-shaped UFO. It had a yellow-ish colored luminous aureola, and a blue light in the center of it. The size of the object was approx. 3 ft.

YECAPIXTLA, MEXICO, Sept. 21, 1968 - A municipal employee of this city, Mr. Raimundo M. Sanchez, saw a circular flying object which disappeared suddenly and discharged black smoke.

CUERNAVACA, MORELOS, Sept. 23, 1968 - Mr. Octavio Huerta, a lawyer, was driving toward Cuernavaca, when he saw a luminous object hovering near the city. This sighting coincided with a black-out in Cuernavaca.

MEXICO CITY, NOVEMBER 26, 1968 - Twelve brilliant objects were witnessed crossing the sky by many hundreds of people, some of whom were attending a film festival. The objects were reported to have flown from horizon to horizon in perfect formation... SOURCE: "LA HORA" CREDIT: A. L. COEN, E.P.I.C.

CUZCO, PERU, NOVEMBER 28, 1968 - An investigating team from the National Interplanetary Institute reported that they had discovered huge caves, which they thought to be hangers for "flying saucers", in a mountain close to this South American city... all agree that the caves seem to be the work of intelligent beings. Many UFO sightings have been made by residents of the area, and many have reported seeing "small beings" from time to time...

\*\*\*\*\*

THAT "LITTLE MAN" PHOTO - The photograph of a "little man" on page 41, SAGA, March, 1969, was heavily retouched by the magazine's art director and does NOT accurately resemble the original. The photo was first sent to Miss Carmena Freeman, editor of Dell's "UFO REPORTS - FLYING SAUCERS", in August 1967. When that magazine folded, Miss Freeman passed the picture along to me. My investigation covered the period from the fall of 1967 until the summer of 1968. I felt that I had collected sufficient documentation to authenticate the photo and so I turned it over to the editor of SAGA magazine. The picture was copyrighted in the photographer's name and he was paid 50\$ by SAGA for one-time use only.

The first attempt to reproduce the picture was a failure. It is predominantly blue and the bluish tones washed out the figure almost entirely when plates were made. So the art director underexposed the background and cut out the figure and overlaid it. If you examine the published photo carefully you will be able to discern this overlay. This is a common procedure used in many magazine illustrations.

Black and white enlargements were made but they proved to be very grainy. Copies were circulated to ufologists around the world for study, comparison and analysis.

Unfortunately, you cannot possibly judge the original photo by the SAGA reproduction. The overlay process has distorted the spatial relationships of the object in the picture. The background is almost completely obliterated. If there is sufficient interest I will make arrangements with the photographer to distribute original copies of the photo. SIGNED: JOHN A. KEEL ---  
ADDRESS: BOX 351, Murray Hill Station, NY. NY. 10016

UFO LANDING IN MARYLAND BEING INVESTIGATED BY NICAP: - A 16 year old Bethesda youth, delivering The Washington Post in Bethesda, says he saw a UFO in the River Road - Western Avenue vicinity the morning of October 24. It wasn't hovering in the air-- it was ON the ground.... The UFO was spotted by the Post carrier about 6AM on Oct. 24, which was a Thursday. Sighting was in a small park near River and Western. The youth describes the object as "disc-shaped with a cone-shaped protrusion which rested on the ground." "It was quite large, he said, "about 17 yards across the disc portion." There were alternating dim red, white and yellow lights around the center of the disc, he continued, and the object did not move. Street lights behind the park, reflecting on the disc, made it appear that it was of a silver, metallic material... The carrier, said, however, that he saw a hole in the ground, about two feet by a foot and a half, where the object had been. There was also a circular area of scorched earth, about two feet wide, surrounding the hole... A NICAP team of eight men, headed by Lore, came out to inspect the area and talk to the youth. Included in the group was a man from the National Aeronautics and Space Agency and one from the Library of Congress. The group took earth samples from the hole and the surrounding scorched earth which are now under analysis... The NICAP group also ran a geiger counter test on the spot and found no change in the radiation count. But, Lore explained, "that was six days after the sighting and rain would have washed away radiation." ...

JANUARY 1969 -- A SUMMARY.

by

JOHN A. KEEL

The month of January has long been a "flap" period although the majority of all January sightings have gone unnoticed by the Ufologists. There was a major flap in Virginia, West Virginia and California in January 1965. The celebrated "flap" around the Wanaque Reservoir in N.J. began in January 1966. A nationwide (but little publicized) flap erupted in January 1967.

While the Air Force tables have proven to be unreliable and probably have been deliberately falsified, they can be used to illustrate this January flap phenomenon. The Condon Report reaffirms that only a very small percentage of all witnesses report directly to the AF. This figure may be as low as 2%. This means that all AF figures must be multiplied by 98 or 100 to arrive at a reasonable estimate of the total number of sightings. My own investigations have led me to suspect that the ratio may be considerably higher... perhaps 250 unreported sightings for each reported incident. If you examine the AF chart on page 514 of the Condon Report, you will find that 67 reports are listed for January 1953 and 91 for February 1953. Only 41 reports are recorded for the traditional flap month of July in that year. The total number of reports for the first three months of 1953 constituted nearly half of the sightings for that year. Multiply 67 x 100 and we arrive at 6,700 sightings for January 1953. January '58 reveals 61 AF reports and Jan. '67 lists 81 reports.

Our study of January 1967 disclosed a "flap" condition beginning on Sunday, Jan. 15th and extending throughout that week with particularly heavy concentrations in the mid-west.

By studying all of the geographical and time factors, I arrived at the conclusion that there would be a new "flap" early in January 1969, beginning in the mid-west and peaking around Wednesday, January 15th. Reports are still coming in but it does appear that the anticipated flap took place almost precisely as predicted.

According to researcher Roy Davis in Green Cove Springs, Fla., a wave of sightings began around Jacksonville, Fla. at 9PM, Thurs., Jan. 5th, 1969. There were power failures in some towns in the area at 9:30 PM.

Three days earlier, on Jan. 2nd, a wave of sightings took place in Missouri (Joplin, Webb City and Cartersville). On Jan. 9th there were extensive sightings in Iowa and Illinois, and additional sightings occurred near Springfield, Mo. on Jan 12th.

Meanwhile, a great wave encompassed the state of Ohio but was largely ignored by the press. Those "fireballs" appeared repeatedly in the Cleveland area early in January and numerous low-level sightings have been received from all over the state.

CONTINUED

Other sightings have come in from New York state for this period, and from the usual busy areas of West Virginia. Early in January a multi-million dollar fire razed four major buildings on the Main Street in Point Pleasant, W. Va., home of the mysterious "Mothman". A series of sightings also began in Northern New Jersey.

Early indications are that this "flap" will be massive but we will have to depend on the individual reports rather than newspapers. Thus far, about 10% of all the known sightings have appeared in local newspapers.

On Sunday, Jan. 26th, "a brilliant flash of light" sailed across three mid-western states, covering Iowa, Illinois and Wisconsin. Pilots at Chicago's O'Hare Airport reported seeing an orange fireball over the airport at 1:02 AM - CST. In Appleton, Wisconsin a policeman reported seeing an orange fireball trailing a blue flame at 12:55 AM. There was a two second power failure in Appleton at the time of the sighting. Since Appleton is less than 200 miles from Chicago, the 7 minute time difference in these sightings could rule out the routine "meteor" explanation. The object followed the standard "UFO Route" of NW to SE - which is not the usual course for satellites and debris re-entries. No Canadian sightings have yet been received. (FOR A SUMMARY OF OUR "METEOR" STUDIES -- see MALE, March 1969, and the forthcoming FSR NORTH AMERICAN REPORT.)

In the early morning hours of Feb. 8, 1969, "a blinding blue-white fireball" traversed a 1,000 mile route from NW to SE when it appeared first over Arizona and rocketed into Mexico. It was believed that the object descended "in the almost impassable terrain of the Sierra Madre south of Chihuahua and north of Durango, Mexico. "The light was so brilliant we could see an ant walking on the floor," said Guillermo Asunsolo, A Chihuahua newspaper Editor. "It was so bright we had to hide our eyes."

Both of the above "fireball" reports were carried on the national wire services. In the past, such "fireballs" have precipitated a wave of sighting reports extending over several weeks. Low-level UFO activity usually begins about three days after the "fireballs" appear.

Individual UFO sightings usually have no real value except when they contain sufficient details (time, place, direction traveled) for use in quantitative studies. We would appreciate receiving any reports from your particular area during this period.

We expect heavy activity during the next three months, with a probable peak around March 19, 1969. There may be considerable "contact" activity in March. (Three contacts were reported thus far for January, and M.I.B. activity has also increased markedly.)

"Fireball" and "moving star" reports are extremely important. Do not try to evaluate the validity of such reports yourself. They must be compared with the known patterns and the overall activity before any conclusions can be reached.

JOHN A. KEEL  
Box 351  
Murray Hill Station  
New York, N.Y. 10016

THEORETICAL REMARKS ON "CONTACTEES" by HANS LAURITZEN

It is right that we do not have enough information to draw a finite conclusion as to what happens during a 'contact' without fearing to make a mistake. It must be reasonable to look at all possibilities that we can in any way conceive of. It is difficult to say whether there is a PHYSICAL or a psychological reality behind the contact cases. If we take the standpoint that there IS a physical reality behind them, we could see WHICH possibilities there are to create the events that happen during a 'contact'.

The 'contactee' often claims to have heard voices inside her or his head and they call this 'telepathy'. However, it cannot be ORDINARY biological telepathy. It must be AMPLIFIED telepathy.

The human auditive nerve system is sensitive not only to sound frequencies but also to certain electromagnetic waves, which build harmonics to the sound frequencies. Hearing is, in large part, a function of the BRAIN as well as the COCHLEA. The cochlea, the seat of hearing, is a tiny chamber shaped like a snail's shell. It is a TRANSDUCER that converts mechanical energy into electrical signals. Special electrodes placed near the ears can transmit sound by coupling radio-frequency signals through the skin to the nerves of the head. Certain electromagnetic waves can also affect the COCHLEA and the brain direct, AND THE CONTACTEE WILL GET THE IMPRESSION THAT TELEPATHY IS USED.

The brain and the inner part of the human optical nerve system are sensitive to certain electromagnetic waves. By using a kind of holography tecnics it might be possible to produce any PICTURE in the BRAIN of the contactee. So the contactee have really seen, what he claims to have seen, -- but -- there might NOT have been any physical object behind the picture produced in the brain. So - there could easily be ANOTHER REALITY behind it.

The case where the "being" approaches the 'contactee' and talks to him concerning "his" mission here on Earth, where he is to "save" the terrible human race from its own destruction, the result of this "contact" is just ONE. "They" are good and "We" are bad. Talk to a classic "contactee" and you will see that in speaking of the human being he talks of destruction, of wars, of earthquakes caused by men, of deaths, and of the most negative aspects of human beings. Ask for the POSITIVE aspects and he will say that there are none.

We have two or more 'types' of close-encounters or "silent contacts" viz: The first type where the sighted "extraterrestrial" is seen shaking hands and running off to fly in his machine, and the second type where the "Contactee" has a kind of religious mission and where he is to save the human race from destruction. I believe that both types are real, but the QUESTION is -- WHAT KIND OF REALITY IS BEHIND THEM? Too many cases involve contacts of the second type, and we can see the pattern emerging which REPEATS itself in nearly every case. We are faced with several possibilities.

CONTINUED

First of all it might be that the 'Visitors' are so highly evolved - ethically - that they try to help us from self-destruction.

The second possibility is that the 'Visitors' want to take over Earth --- but they realize that we have effective defense weapons. So, by treating us with rays and waves provoking religious feelings, they want us on our knees praying to them when they come.

The third possibility is that the UFOs are 'secret craft' constructed on this planet. So they prefer that we BELIEVE in 'Visitors' from 'Outer Space', so that we do not discover that they are constructed here.

I know about 20 people who are involved in the construction of a saucer-shaped craft, or in the search for a response to the motive power of flying saucers. But -- there are many more, especially constructed military craft....

HANS LAURITZEN --- COPENHAGEN, DENMARK ---

\*\*\*\*\*

SCOPNOTE:

Ever since the too-much publicized Condon Report has been aired for public consumption myself and my associates have been bombarded by various and sundry representatives of the news media (both local and national) for our 'reaction'. Reaction? How do you react to snakebite??? However, I DO feel that many in the UFO field and the public in general have overlooked one small item! Namely -- that the Condon Report told the truth in a great many respects!

- 1) That there was NO EVIDENCE of "extraterrestrial" vehicles..... Now- ----- be honest with yourself. How much 'material or physical' evidence have YOU seen, felt, touched and smelled that you could POSITIVELY IDENTIFY AS BEING VENUSIAN, MARTIAN or OUTER-SPACIAN????? On the contrary - there is MORE 'evidence' of a physical nature that points to a 'terrestrial' craft rather than "extraterrestrial" one...
- 2) They did NOT say that the 'craft', in themselves, did not exist..... They left it a moot question. NOT a positive NO. As in the above article, REALITY is an illusive substance! What is REAL to you - makes no sense whatsoever to a Hottentot in Africa. REALITY, in itself, is RELATIVE.....

Material or physical evidence means just that! To be used as EVIDENCE it must be tangible, discernable, capable of being bisected, dissected, microscoped and dyed, tried, stained and strained! Fried, boiled, baked and roasted! I am sorry to say that THEORIES cannot be analyzed in the above manner!

My friends, a 'light in the sky' can show many things - speed, direction, altitude, coloring, intelligent control and the ability to maneuver. It does NOT show POINT OF ORIGIN.... NOR do four landing-gear holes, footprints or an 'occupant'! They show EFFECT ----- not cause!

Be honest with yourself - forget the theoretical research - and start looking for something that can be analyzed in a laboratory, and can stand the light of day!

(Reprinted from:

SPACEVIEW -- PO BOX 21007, Henderson, New Zealand -- Editor: HENK HINFELAAR)

We have often been asked "Why do you record earthquakes as a feature of space research?" The answer is quite simple - "Because we are convinced on the basis of our observations - that the cause of earthquakes originates in space." However, this is only part of the answer, as we are fully aware that earthquakes have always been with us.

Fluctuations in our geomagnetic field are caused by impulses from the Sun, and any great change in the latter's behaviour is bound to affect not only the Earth, but other planets as well... To us it was therefore rather significant when we found that since 1950 earthquakes - on a global scale - had increased by 400%. A quick check revealed that this increase had been particularly progressive over the last 10 years. The reason for the accelerating disturbances in the Earth's crust became clear when we learned that Dr. Harold D. Babcock, of Mt. Wilson and Palomar Observatories had announced that the polarity of the Sun's magnetic field had reversed itself. The reversal was slow. It commenced in mid 1957 and took nearly a year to complete.

GREAT CHANGES - Prior to the reversal, the polarity of the Sun's field was opposite to that of the Earth's. It can be seen that this change in polarity must affect our planet in so far that repulsion applies where there was previously attraction. In view of the orbital path round the Sun, the Earth's field wishes to remain as is, but the Sun's reversed field is attempting to change it. This conflict in forces has brought stresses and strains about upon the Earth's crust, causing new earthquakes in places that are normally not quake-prone. Abrupt changes in our geophysical structure and in the weather will become more and more apparent while the Earth's field is gradually changing...

A SCIENTIST'S OPINION - One of the mentioned seismologists, Dr. F. F. Evison, who is now Director of the Geophysics Division of the Department of Scientific and Industrial Research, published a new theory for the cause of earthquakes in 1963. He was quoted as saying that "Quakes might be caused by sudden changes in the crystalline form of minerals in the Earth's crust and underlying mantle under the influence of pressure and temperature changes in the Earth's depths."...

EXTRAORDINARY WEATHER - The present abrupt changes in the weather that are being experienced (and this certainly does not apply to New Zealand only) give me cause to assume that the Earth's field is trying to resist a gradual change in polarity and that the Earth, in fact, attempts to change direction from its normal orbital path around the Sun. Should this be the case, great gyro forces could cause an axial shift and a breaking up of the globe's crust.

There is some evidence of this if we consider that scientists have already mapped a giant 45,000 mile crack opening up around the globe. This world-wide rift averages 20 to 25 miles in width and two to four miles in depth. This geological feature appears to be a young and growing one. It is the source of shallow earthquakes that go along its entire length, and all major fault lines are part of this rift.

---

CONTINUED

---

CAUSE AND EFFECT - Having discussed the various mechanisms that are involved in the phenomenon of earthquakes, we must now consider the immediate cause that triggers them off. The cause is ELECTRICAL and finds its origin in the geomagnetic field. In it's present unstable state, pressures are uneven and a temporary local collapse of the field (cave-in) can occur quite frequently. Depending on the severity of the "cave-in", a sky-quake may precede an earthquake in which case a booming sound and flash are usually recorded. This is caused by a breaking up of the field. The ABSENCE of gravity just prior to an earthquake is an established fact, and in many cases observers have reported the floating of paper and light debris. Animals are strangely affected by these electrical disturbances and birds immediately cease their chirping or singing. ... In 1966 Japanese seismologists analysed tremor patterns in the mountain town of Matsushire (central Honshu) as this town had a record of more than 100,000 quakes over a period of 6 months. Working with an inclinometer - an instrument measuring the direction and the strength of the magnetic-field - the seismologists found that prior to the occurrence of a quake, the meter showed gradually reduced readings. the quake occurred when the needle on the meter hit the lowest point on the indicator scale. The needle returned to the normal position after the quake. The outcome of this experiment is considered a breakthrough towards accurate quake forecasting. At the same time it proves to me, beyond a shadow of a doubt, that the absence of a field (cave-in) at the time of the quake enabled the built-up pressures within the crust and mantle to be released ..... and the earthquake was born.

UFO OBSERVERS - Having established that earthquakes are the result of electrical phenomena as yet beyond our control, we must now look at another phenomenon that has been with us for more than 20 years. I am referring to UFO'S, the existence of which all investigators agree upon. As to their purpose we are still very much in doubt.

Nonetheless, a few investigators - among which your Editor - have for some time now looked into the connection that appears to exist between earthquakes and the presence of UFO'S. To the best of my knowledge there are only three investigators - outside of your Editor - who have made an active study of the correlation... they are my friends Bob Gribble, of Seattle, and Stan Seers, of Brisbane, and the Frenchman F. Lagarde.

In the Journal "Interplanetary" (now defunct) of Jan. 1961, the Editor - Bob Gribble, shows a clear picture of the correlation ... in cases selected from his files for the year 1960. The list covers the months Feb. to Dec. All cases involve strong earthquakes along the American Pacific coast - Japan-Indian Ocean - New Zealand - Algiers - Alaska - Fiji, etc. with spacecraft activity either occurring just before or just after the mentioned earthquakes.

Gribble rightly observes that the majority of severe earthquakes take place under the oceans, and that it therefore would be impossible to correctly assess the amount of spacecraft activity that is bound to occur over this vast area.

CONTINUED

STAN SEERS, who works as a laboratory assistant in the Physics Department of the University of Queensland has done considerable research into earthquakes and it's possible relationship to effects in the geo-magnetic field. He notes that activity in the Earth's magnetic field is usually associated with solar activity and as the President of the Queensland Flying Saucer Research Bureau - he quite logically has pondered about the close interest of alien spacecraft in regard to Earth. It did not take him long to consider the possibility that UFO activity might have a bearing upon changes in the Earth's field. He has since been working along these lines and feels, on the basis of his research, that only a cosmic event that involves our Solar System would make alien spacecraft come from great distances...

...F. Lagarde... writing in "Lumieres dans la nuit", presents a list of sightings reported by Aime Michel, where UFO'S have been observed either on the ground or immediately above it. He shows clearly that of 86 observations, 32 were situated over known faultlines. This figure represents 37% of the total of the cases studied and Lagarde points out that this can hardly be ascribed to coincidence... Lagarde feels that the general indifference displayed by our alien visitors is justifiable when one considers that they have a job to do which is of great concern to all of those who inhabit the Solar System.

SUMMARY- On the basis of the evidence available we have established that the polarity of the Sun's magnetic field has reversed itself. As a logical consequence we must also accept that this reversal is bound to affect the planets in our Solar System and for our purposes, the Earth in particular.

These effects have become noticeable through peculiar changes in the weather and a progressive increase in seismic calamities. Reliable and accurate observations of both these changes have created a mountain of scientific evidence which cannot be flouted.

... In the light of all this it is not really so remarkable that alien space ships pay us visits in evermore concentrated numbers. Ever since the dawn of the modern UFO era Earth changes have accelerated at an alarming pace, and having regard to the obvious more advanced technology of the aliens it would not have to difficult for them to detect the anomalies in our geomagnetic field. They knew the cause and this prior knowledge enabled them to predict the effect. In spite of this, some investigators still labour under the delusion that our alien visitors come here to admire our rocket bases and weapons factories, or are preparing for a take-over bid of a planet that cosmically speaking is in real trouble.

Undoubtedly the aliens are concerned and so they have reason to be. Their general indifference towards the Earth population no doubt indicates that they are doing cold-blooded scientific research of a planet whose instability may greatly affect the rest of the Solar System.

\*\*\*\*\*

SCOOPNOTE:

The above article is a good one and a well thought out one -- however -- to ME, at least, it does not PROVE A POINT OF ORIGIN (extraterrestrial)

Do all researchers have my problem? Do you occasionally run across some item which seems to be of considerable potential value IF more information could be obtained concerning it? I do -- and I find it quite annoying.

Let me give you a few examples of such "IF" material:

- 1) Some 15-20 years ago, I recall reading one of the "Strange Mystery" comic books which occasionally featured a page or two of "true mysteries". This particular issue contained a one-page feature on a medieval personage named - "MENIADES". As best I can recall, Meniades was a physician of sorts (perhaps an alchemist), who ministered to many during the time of the Great Plagues in Europe. Most interesting of all, Meniades allegedly employed some kind of aerial vehicle in his ministrations to the sick. The name of Meniades (not to be confused with Maimonides) has been checked in various volumes, which seemingly, should list it if he had actually lived. Thus far, nothing has been found. Does anyone have any information on this mysterious man?
- 2) Did a UFO dump a load of creatures into Loch Ness in the year 1215 - A. D. ? Well, that's another one of those questions that I've not yet been able to answer. According to a member of a group called Parapsychology Research (formerly headquartered in Tacoma, Washington - now believed defunct), one Dr. Albert C. Doyle wrote an article concerning this story for an issue of their P.R. BULLETIN. Dr. Doyle mentioned the legend of Douglas McAlistire, who allegedly saw the "dump" take place. If Dr. Doyle, or anyone else having information, should happen to read this, I would very much like to know more about this story.
- 3) Daniel Gray, a farmer living near Flint, Michigan, was a very puzzled man on April 23, 1897. On that date, while working in his field, Gray heard "a terrible rumbling and whizzing sound directly over his head." Upon looking upward, he saw a dark object flying through the air at a high rate of speed. The sight of the strange "airship" dazed Gray for a moment. When he again glanced skyward, the craft was no longer in sight, but he now saw a newspaper dropping earthward. He picked it up and saw that it was a newspaper published at Toronto, Canada, bearing the date of October 5, 1896. The paper was dry and well-preserved. If this story is true, and we have no reason for doubting it, was there some special reason for dropping that particular newspaper at Gray's feet? Will some Canadian reader check the files of all Toronto papers for the date in question and tell us if that issue contained anything which might pertain to the airship/UFO subject?
- 4) Although we may seem to be asking for a lot of research on the part of our Canadian counterparts, could someone also check the TORONTO STAR for Feb. 10-12, 1913? The great "meteor" procession of Feb. 9, 1913, was seen in both Canada and the U.S. On Feb. 10, flights of dark objects "in scattered formations" were seen in the skies over Toronto. Yet, no one seems to have exhumed this complete story from the STAR'S files.

Hey, wait a minute, you're saying! This isn't really an article I'm reading - it's just a form of begging. Well, maybe you're right. I am begging, because I'd like to know the answers to some of the things that have "bugged" me for quite a while. Can somebody help? I'll appreciate it.....

"ABOMINABLE SNOWMAN" IS BACK -- MAO'S SOLDIERS CHASED HIM !!! - P. S. Nirash -  
The London Observer ---

GANGTOK, SIKKIM -- The Abominable Snowman is back in the news again. This time the credit goes to the troops of Chairman Mao Tse-tung. According to a report in a Hong Kong newspaper, the snowman was seen by a villager in Tibet.

Chinese troops went after the legendary monster with guns, ropes and nets, said the paper. The creature was described as a reddish-brown figure which stood up and looked like a super-human. There was no indication, however, that the snowman was captured -- with or without the aid of Mao's thoughts.

The last time the creature was in the news was in 1960 when an explorer reported having seen "a large hairy animal loping along the rock face - about 5 ft. tall, with dark fur and a round head, a lighter coloured face and ears which lay flat against the head." The footprints were described as partly human and partly animal. In the same year, prints were seen by members of a British party led by Sir Edmund Hillary, the conqueror of Everest. No one saw the snowman himself, however. But two years before it was reportedly seen by a Russian - A. G. Pronin, and by an American expedition led by Professor Dyhrenfurth.

The creature first made world headlines in 1887 when W. A. Waddel wrote about it. But to the people of the Himalayas the elusive Yeti has long been a real creature. Yeti's have been seen by numerous herdsman and others have claimed to have seen it or it's tracks. I have come across such people and have talked to them. I have also seen many old Bhutanese manuscripts and murals in dzongs (forts) and monasteries depicting the snowman. The accounts accompanying them of it's habits, appearance and attacks on human beings and animals fit in with the descriptions.

According to local octogenarians there are three distinct types of snowmen. A LITTLE MAN, the smallest of snowmen, which Bhutanese often claim to see --- a FAIRLY LARGE snowman generally very docile but said to carry away human beings as well as cattle when aroused -- and the most dangerous -- A SAVAGE, CARNIVOROUS BEAST about five feet tall, which is long-haired and ape-like with muscular build. This is the one which has won popular acclaim as the Yeti and is said to inhabit snowy heights from 15,000 to 25,000 feet.

All authorities, however, agree that the characteristic common to all types of snowmen are a STRONG, PUNGENT ODOR and a HIGH WHISTLING CALL. Of the younger generation there are only a few who claim to have seen this legendary creature. One is Mrs. Soanm Gyatso, wife of the Indian Everest hero, the late Sonam Gyatso.

She claims to have seen it when she was younger. She told me that the Yeti used to come to her village quite often and she distinctly remembers having seen it one night about 20 years ago at Yanang, her village in Sikkim.

WHITHER 1969 ?

an OPEN LETTER by RICHARD HACK

TO: The Congress of Scientific Ufologists and Ufologists Everywhere ---

FROM: A Member of Your Number

As I write this on January 28, 1969, I am surveying the accomplishments of the past twenty years of Ufology. Not hard to do! There were none!

Allow a brief rundown, please.

The Congress of Scientific Ufologists manages to turn the MIB over to a committee and welcomes the Condon executioners with open arms. The Condon Committee Report itself cleans up on the publicity market. More international computer studies are urged by the prima donnas in the academic field. Saucer News revives the rumor column -- a surprise to those who thought there was little else in the magazine - or Ufology. John A. Keel winds up accused of being an anti-semitic CIA agent under alien control - because he uses the term "buff" once, too often or too little. APRO shows that the CIA wears black and kidnaps witnesses to hush them up. NICAP doesn't hear any of this - the Luray caverns are echoing to the cries of another "emergency issue" of news clippings, Senate reports, and praise for itself. The Air Force? Still there.

AND - Nobody knows ANY more about UFOs than in the '50's!!!  
Joan Whritenour's comments in a recent issue of SAUCER SCOOP are pertinent:

"Who really cares just which (group) is the best - or which one is the more famous? Is this going to help the local investigator who is called upon to investigate a landing - and who knows nothing about proper investigative methods, who has not been trained in the usage of proper research equipment, or who doesn't even know the right questions to ask the witnesses?"

Ed Biebel's comments to the 1968 Congress of Scientific Ufologists are a timely a year later:

"A genuine effort must be made this year or else now is the time to disband the Congress."

The time to start is NOW - not June 19, 1969. Get off your butts and RESEARCH. Walk into the Congress's closed sessions with a briefcase full of data, not clippings.

THIS year is the test. Ufology is at its lowest ebb in years. All the errors of the past twenty years are in focus. All the lines are drawn, the problems and the solutions are glaringly visible.

WHO MOVES FIRST ?

STOP !!!!!!! DO YOU HAVE THESE IMPORTANT MAGAZINES FROM UAPA PUBLICATIONS????  
IF NOT ..... ACT NOW ..... AND ACT FAST !!!!!

- A.) "FLYING SAUCER DIGEST" World's top FULLY ILLUSTRATED UFO magazine loaded with amazing articles on sightings, landings, aliens, and information. This is a large 8½ x 11 magazine "professionally edited and illustrated" by researchers who have been in the field for over 48 years combined! NOT a newsletter, but a MAGAZINE! SUBSCRIBE NOW! Don't miss a single issue! 6 issues -- \$3.50.
- B.) "FLYING SAUCER CLASSICS" The top classical UFO cases from 1896 to 1966. Each case is professionally illustrated and documented for easy reading and understanding. Large 8½ x 11 magazine. Truly a collectors edition. ONLY \$1.00!
- C.) "FLYING SAUCERS 1947-1967" This magazine is filled with sixty (60) of the "best" sightings (3 from each year) covering 20 important years of UFOlogy. Magazine also includes illustrations of "various UFO shapes" and "types of aliens seen around UFO landings". ALL THIS: ONLY 50¢!
- D.) "UFO TERMINOLOGY" Know what is being said in UFOlogy! Every true UFO researcher should have this UFO "dictionary". ONLY 50¢!
- E.) "UFO MAPS" Set of 10 different UFO MAPS which pinpoint all UFO activity in the United States and the world. Maps show UFO sighting areas, various landings, aliens seen, UFO organizations, Magnetic effect areas, and Angel Hair falls. All maps mounted on heavy paper-board and suitable for framing.  
COMPLETE SET: ALL 10 maps ..... ONLY \$1.50!
- F.) "FLYING SAUCER PICTORIAL" This BIG magazine, edited by pioneer researcher Max B. Miller, is very rare and includes over 100 photos in color and black and white. Photos show: actual UFO occupant, UFO'S photographed in sequence, over power lines, near and on the ground, and astonishing blow-up shots. Magazine also includes fantastic articles. SEND NOW! Limited supply. Sorry, first come, first served! ONLY \$1.25.
- G.) "PHENOMENOLOGY" AT LAST! A new magazine loaded with the worlds strangest and unexplained phenomenon. You name it! Ghosts, ESP, disappearing people, sunken continents, lost civilizations, strange people, UFO's, unknown dimensions, Egyptology, and much more. This large 8½ x 11 magazine is also illustrated. Send now! \$1.00.

HURRY!!! FILL OUT ORDER BLANK BELOW AND MAIL TODAY! DON'T WAIT!!!!!!  
FREE! That's right! FREE! If your order totals \$5.00 or more, check one of the offers (absolutely free) below. OFFER 1, 2, or 3.

GENTLEMEN: Please send me publications checked below.

IN MEMORIUM

We wish to say a sad goodbye to a fellow researcher and ex- Air Force investigator, CHUCK ROBERTS, of New Port Richey, Florida. He passed away from a heart attack on February 13, 1969. At the time of his death he was the Police Radio Dispatcher in New Port Richey. He was 47 years old, and leaves behind his mother and father. Chuck was always on the 'spot' in his job for his work in the UFO field, but was always ON the spot when any UFO -related event arose in his area. He investigated many reports in the Hudson, New Port Richey and Brooksville areas and was along with us the night that UFO's were spotted and photographed in Hudson last summer. He will be missed by all who worked with him.
